

2026

Early approach to I_H and I_M
Uniqueness of starting points

2027

Study artifacts from hyperviscosity
 t -dependent η , slope-limited diff.

Catalogue of GW spectra for
different magnetogenses

Spectral box extension
Reconnection assessment
 Pr_M dependence

Thermodynamic revision during recombination

Two-fluid radiation \rightarrow matter transition

Clumping factor & Hubble tension

Magnetic field at to $z=100$ incl dark matter

2028

Compute-intensive
Code development
Major output
