

Nordita Scientific Events 2016–2026

Activity Review

175 Scientific events	1 539 Event-days	9 802 Event participations
87 Conferences and workshops	62 Programs	24 Schools
60.9 Mean attendance	55 Median attendance	92% Attendance data coverage

Event participations are not unique individuals. Mean and median attendance are based on 161 events with recorded participant counts. Event-days are scheduled weekdays.

Key Findings

1. Established capacity for sustained scientific program activity

- 62 programs organized during the reporting period accounted for 1,015 event-days (66% of the total), with an average duration of 16.4 weekdays.
- Programs represented approximately 35% of all events, but accounted for two-thirds of the total scheduled activity.
- Demonstrated capacity to facilitate extended scientific interaction beyond conventional short-format events.

2. Substantial participation and broad scientific engagement

- Relatively close mean and median attendance suggest that the overall average is reasonably representative of typical event attendance.
- Figures demonstrate institute's capacity to convene scientific communities across its event portfolio.

3. Resilience and recovery following the pandemic

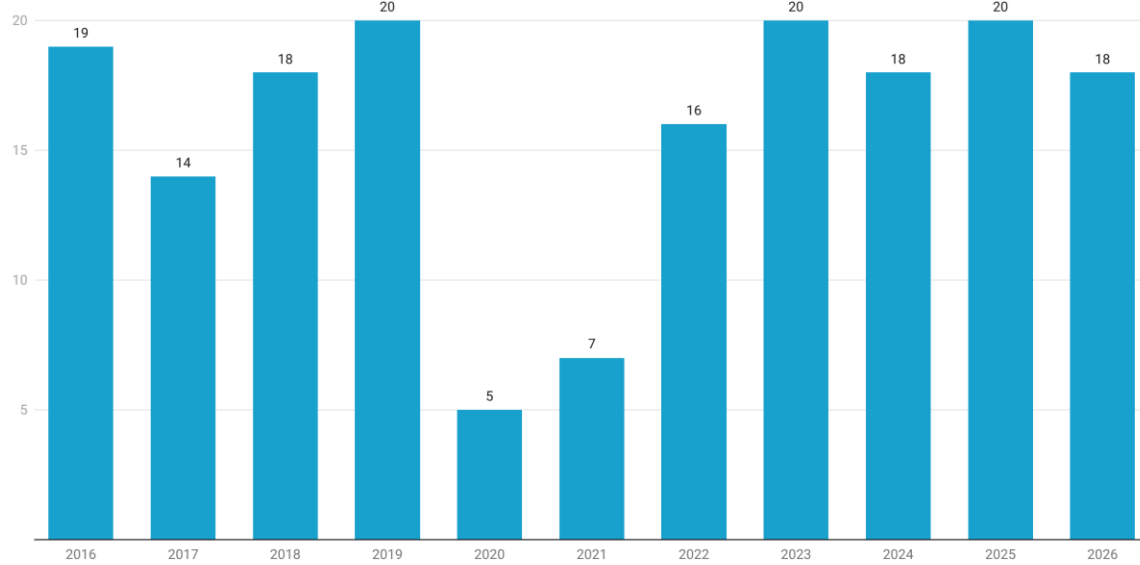

- Scientific event activity recovered substantially following the disruption of 2020–2021. Annual event numbers returned to pre-pandemic levels, reaching 20 events in both 2023 and 2025.
- Recorded event participations increased from 865 in 2022 to 1,332 in 2025, exceeding the previous recorded peak of 1,230 in 2019.
- Recovery demonstrates the continuity and resilience of Nordita's scientific program as a format.

4. Scientific breadth and complementary event formats

- The portfolio comprises 87 conferences/workshops, 62 research programs, 24 schools, and 2 symposia, providing complementary formats for scientific exchange, extended research interaction, and advanced training.
